Summary

My interest towards system/software where came in my life in
childhood days when I was used to sit in front of computer & wonder
how the things run on computer so precisely, accurately & as well
as online world. From this thought, I got passionate to explore new
things on internet & do some various other things too.

I do always think those things which human intelligent can not do
without the help of system, where system does all the things easily in
fraction of seconds & don't even consume more time. "This is like a
super power"

Since, that period I thought myself that in future, I will definitely join
the IT sector & do study about it in broadly. By that time I realized my
passion & carries lies here & I loved my stream which is choosened
by me & this disparate passion of mine will be carried thought my
education in TIET.

From some valuable resources available to me I got to think vastly
about this stream not yet as a kid, but as a important part of my
career life. Where I studied & learned many language, algorithms,
higher mathematics. All as pretty much interesting & fascinating that
has drove me as a kid.

From here my learning new things have began & it shown me that
there are yet to learn more.

So now, this my passion remaining with me & to gain a good carrier.

There are certainly, get more to be learned & to be solved by me &
new things to be created and buildup. Am very much great full to be
passionate in this stream.

My dream is to make this world a better place with help of computer intelligence skill.

Skills ~ Python, C++, Html, Css, Javascript, Node.js

Familiar with ~ Java

Frameworks ~ Bootstrap, JQuery, Express.js

Connect with ~
~ Twitter ~ thefstalphabet
~ Github ~ thefstalphabet
~ Instagram ~ thefstalphabet

When i am not working i usually spend my time with nature.

Experience

GeeksforGeeks
Technical Content Writer
January 2021 - Present (2 months)
India

Education

Takshila Institute of Engineering & Technology, NH7 Road, Madan Mahal, Jabalpur-482002
Bachelor of Technology - BTech, Computer Science · (2018 - 2022)
